

IT'S HOW TODAY'S GUESTS WATCH

Roomcast™

powered by Google Chromecast

Your guests have a world of content in the palm of their hands. With Netflix, YouTube, Pandora, Showtime, ESPN and hundreds more apps, they access all their favorite content on their smart devices.

What if there were an easy way for guests to stream their content directly to your in-room TV?

TeleAdapt has developed Roomcast for exactly this. Roomcast is an all-in-one bring your own, over the top content streaming box for guest rooms.

Roomcast Features

- **Chromecast**
Chromecast is the simplest way to get content from a mobile device to the TV.
- **Bluetooth Connectivity**
Let guests enjoy music and audio streaming with Bluetooth from any app including Apple Music on their laptop, phone or tablet.
- **HDMI Media Hub**
Some guests bring their own console. Xbox, Playstation, Fire Stick? No problem. Just plug it in!

After joining the network, guests will discover the familiar "cast button" in all of their cast-enabled apps. There is nothing to download; no email or passwords to enter. And yes, it works on both Android and iOS devices. It couldn't be simpler: join the room network, launch your favorite cast-enabled app and cast.

Roomcast is a solution that is simply added to your existing TV system. Make your guests feel at home by providing them with the freedom to enjoy their own content.

Roomcast™

powered by Google Chromecast

THE EASY WAY TO STREAM

Easy for Guests

One press of the Roomcast dial brings up Roomcast on the TV, where guests will discover a private personal area network. After joining they can open any cast-enabled app and tap the Cast button to display their favorite content on the big screen. Everything is controlled from the guest's phone or tablet, using the mobile apps they already know and love. They can even keep using their phone for other things without disrupting what's playing.

Easy for Hotels

Roomcast was designed for easy, secure setup: *no servers, no software, no teams of installers, no contracts.*

Roomcast is an "over-the-top" streaming solution that works along with any existing in-room TV system. The solution works without head-end equipment and includes a secure 802.11 wireless access point which is activated on demand, generating a unique WPA passcode. Just plug it in to your existing TV's and let guests start streaming.

Try it in one, or ten, or roll it out in all of your rooms today.

Stream Your Content

Keep up with your favorite shows on the road. Now you can use Chromecast to stream all your media from your favorite apps and services you already subscribe to.

- 1 Tap the Roomcast dial to begin
- 2 Follow the instructions on your TV
- 3 Join the Personal Area Network
- 4 Open your favorite apps and tap the Cast button

Google Chromecast

Let Guests Stream Their Own Content

Chromecast supports 1,000+ apps, 200,000 TV shows & movies, 30 million songs, plus radio, sports, games and more. Stream right from your own device. No need to download apps or log in to the TV.

SIMPLE
UNIVERSAL
SECURE
COMPLETE

Guests use their own mobile devices. Nothing to download and nothing new to learn. Simply "Join & Cast."

All guests will be supported whether they use iOS or Android smartphones / tablets, or laptops with the Chrome browser.

Guest's private information is never exposed and personal area network ensures content streaming is contained to each guest room.

Chromecast supports 1,000+ apps, 200,000 TV shows & movies, 30 million songs, plus radio, sports, games and more.

The Solution Includes

- **Roomcast Hub**
Streaming box mounts under or behind desk, or behind TV
- **Roomcast Dial / Roomcast Remote**
Place at the nightstand, the desk, or next to the TV
- **Existing Hotel TV**
Simply plug in with HDMI
- **Guests' Mobile Device**
Smartphones including iPhone and Android, tablets and laptops with Chrome browser

Roomcast™

powered by Google Chromecast
